

JOIN OUR TEAM

EXPERIENCED CLINICIANS TO JOIN THE RESPONSE TEAM FOR THE DRUG-RESISTANT TB OUTBREAK IN DARU, PNG

Burnet Institute
Medical Research. Practical Action.

Reducing the Impact of Drug-Resistant Tuberculosis (RID-TB), is a project funded by the Australian Aid program via the Department of Foreign Affairs and Trade. This is part of a multi-stakeholder response to the outbreak of drug-resistant TB in South Fly District, Western Province, Papua New Guinea.

Burnet's contribution is to support the design, monitoring and implementation of a comprehensive strategy to mitigate the TB epidemic and provide quality care for people affected. Burnet's partners include the Western Provincial Health Office, Daru General Hospital, World Vision and the World Health Organization and local community.
